WHAT YOU'LL LEARN

In this Online Lecture Professor of Solar Energy, Arno Smets, explores current trends and developments in solar energy. What is their impact? What are the new possibilities? And where is the technology thriving the most? He discusses opportunities for those wanting to capitalise on this cheapest form of electricity and explores where the technology can take us in the future.

SKILLS YOU'LL GAIN

- ✓ The role of solar energy in the energy transition and climate mitigation.
- ✓ Latest advances in PV technology and the role of circularity.
- ✓ The integration of solar electricity into future sustainable energy systems: Economic viability & required human capital.

The Solar Energy Revolution

ABOUT THE INSTRUCTOR

Prof. Arno Smets

TU Delft | Learning for Life

WHO THIS COURSE IS FOR

- ✓ Solar Engineers
- ✓ Solar industry stakeholders, regulatory professionals and business leaders
- ✓ Energy transition experts and consultants
